Contents of Volume 27 (1988)

Vol. 27, No. 1

Corrections for the non-isothermal hole pressure problem
R. Srinivasan and B.A. Finlayson (Seattle, WA, U.S.A.) 1

Fourier transform mechanical spectroscopy of viscoelastic materials with transient structure
E.E. Holly, S.K. Venkataraman, F. Chambon and H.H. Winter (Amherst, MA, U.S.A.) 17

The viscous squeeze-film behaviour of shear-thinning fluids
T.J. Pratt and D.F. James (Toronto, Ontario, Canada) 27

Rheology of molecular liquids and concentrated suspensions by microscopic dynamical simulations
D.M. Heyes (Egham, Surrey, United Kingdom) 47

On the behavior of viscoelastic free jets with elliptical cross section
S.E. Bechtel, K.J. Lin and M.G. Forest (Columbus, OH, U.S.A.) 87

Short Communication
Time-temperature superposition in nonisothermal flow
J.M. Wiest (Sydney, N.S.W. Australia) 127

Vol. 27, No. 2

Experimental estimation of elongational stresses of dilute polymer solutions and a related examination of some constitutive equations
T. Hasegawa, K. Fukutomi and T. Narumi (Niigata City, Japan) 133

Gravity-driven laminar film flow of power-law fluids along vertical walls
H.I. Andersson and F. Irgens (Trondheim, Norway) 153

An approximate analysis for contraction and converging flows
D.M. Binding (Aberystwyth, Dyfed, United Kingdom) 173

The role of solution structure in apparent thickening behavior of dilute PEO/water systems
P.N. Georgelos and J.M. Torkelson (Evanston, IL, U.S.A.) 191

Transient deformation of an inviscid inclusion in a viscoelastic extensional flow
D.W. Bousfield, R. Keunings and M.M. Denn (Berkeley, CA, U.S.A.) 205

Molecular shape in homogeneous flows: Predictions of the Rouse model
D.A. Hoagland and R.K. Prud'Homme (Princeton, NJ, U.S.A.) 223

0377-0257/88/$03.50 © 1988 Elsevier Science Publishers B.V.

A model of dilute polymer solutions with hydrodynamic interaction and finite extensibility. II. Shear flows
L.E. Wedgewood and H.C. Öttinger (Madison, WI, U.S.A.) 245

Vol. 27, No. 3

Injection and suction of an upper-convected Maxwell fluid through a porous-walled tube
R.K. Menon, M.E. Kim-E, R.C. Armstrong, R.A. Brown (Cambridge, MA, U.S.A.) and J.R. Brady (Pasadena, CA, U.S.A.) 265

Impact of the constitutive equation and singularity on the calculation of stick–slip flow: The modified upper-convected Maxwell model (MUCM)
M.R. Apelian, R.C. Armstrong and R.A. Brown (Cambridge, MA, U.S.A.) 299

Prediction of birefringence, stresses and kinematics in fibre spinning for solutions of finitely extensible macromolecules
M.E. Mackay (St. Lucia, Queensland, Australia) 323

Nonisothermal flow of polymer melts
J.M. Wiest and N. Phan-Thien (Sydney, N.S.W. Australia) 333

Fibre spinning of a weakly elastic liquid
T. Sridhar (Clayton, Victoria, Australia) and R.K. Gupta (Buffalo, NY, U.S.A.) 349

Heat transfer effects in extrudate swell of elastic liquids
M.A. McClelland and B.A. Finlayson (Seattle, WA, U.S.A.) 363

Jeffrey–Hamel flow of Leslie–Ericksen nematic liquids
A.D. Rey and M.M. Denn (Berkeley, CA, U.S.A.) 375
